CONTENTS

Number 1

C. S. Moore & G. S. P. Ritchie. Aluminium speciation and pH of an acid soil in the presence of fluoride 1

Rachhpal-Singh & P. H. Nye. A model of ammonia volatilization from applied urea. IV. Effect of method of urea application 9

P. R. Anderson & T. H. Christensen. Distribution coefficients of Cd, Co, Ni and Zn in soils 15

P. Papadopoulos & D. L. Rowell. The reactions of cadmium with calcium carbonate surfaces 23

G. W. Bruemmer, J. Gerth & K. G. Tiller. Reaction kinetics of the adsorption and desorption of nickel, zinc and cadmium by goethite. I. Adsorption and diffusion of metals 37

D. J. Jensen & C. J. Radke. Caesium and strontium diffusion through sodium montmorillonite at elevated temperature 53

L. A. Mackie-Dawson, C. E. Mullins, J. A. Kirkland & E. A. Fitzpatrick. The determination of the macroporosity of impregnated blocks of a clay soil and its relation to volumetric water content 65

R. S. Shiel, M. A. Adey & M. Lodder. The effect of successive wet/dry cycles on aggregate size distribution in a clay texture soil 71

D. J. Chittleborough & P. H. Walker. Crystallinity of soil kaolinites in relation to clay particle-size and soil age 81

B. A. Goodman, M. L. Berrow & J. D. Russell. Transformation of poorly-crystalline oxides during boiling with NaOH to concentrate iron oxides from soils 87

M. Ma'shum, M. E. Tate, G. P. Jones & J. M. Oades. Extraction and characterization of water-repellent materials from Australian soils 99

G. Rauws & G. Govers. Hydraulic and soil mechanical aspects of rill generation on agricultural soils 111

G. Mew & R. Lee. The genesis and classification of soils on wet terraces and moraines in New Zealand 125

P. Wickramagamage & G. C. Fisher. The numerical classification of soils: a case study using data from West Sussex, England 139

Number 2

N. Matsue & K. Wada. Interlayer materials of partially interlayered vermiculites in Dystrochrepts derived from Tertiary sediments 155

A. R. Dexter, R. Horn & W. D. Kemper. Two mechanisms for age-hardening of soil 163

A. J. Moffat & M. G. Jarvis. The significance of gley features in soils derived from grey parent materials 177

I. A. K. Kanabo & R. J. Gilkes. The effect of soil texture on the dissolution of North Carolina phosphate rock 191

S. C. Kotur & T. Seshagiri Rao. Quantity/intensity and quantity/potential studies in Na–Ca exchange system in some salt-affected soils 199

F. S. Gilliam & D. D. Richter. Correlations between extractable Na, K, Mg, Ca, P & N from fresh and dried samples of two Aquults 209

L. Madrid & E. Díaz-Barrientos. Description of titration curves of mixed materials with variable and permanent surface charge by a mathematical model. 1. Theory. 2. Application to mixtures of lepidocrocite and montmorillonite 215

M. V. Cheshire, R. H. E. Inkson, C. M. Mundie & G. P. Sparling. Studies on the rate of decomposition of plant residues in soil by following the changes in sugar components 227

M. F. Allison & K. Killham. Response of soil microbial biomass to straw incorporation 237

J. E. Gregor & H. K. J. Powell. Protonation reactions of fulvic acids 243

R. E. Wheatley. Ochre deposits and associated bacteria in some field drains in Scotland 253

J. Cornejo & M. C. Hermosin. Evolution of porosity and changes in heat treated lepidocrocite 265

I. R. Willett, C. J. Chartres & T. T. Nguyen. Migration of phosphate into aggregated particles of ferrihydrite 275

Duncan J. Campbell & P. H. T. Beckett. The soil solution in a soil treated with digested sewage sludge 283

Books on Soil Science Recently Received 299

Number 3

G. J. T. Scott, R. Webster & S. Nortcliff. The topology of pore structure in cracking clay soil. I. The estimation of numerical density 303

G. J. T. Scott, R. Webster & S. Nortcliff. The topology of pore structure in cracking clay soil. II. Connectivity density and its estimation 315

B. C. Ball, M. F. O'Sullivan & R. Hunter. Gas diffusion, fluid flow and derived pore continuity indices in relation to vehicle traffic and tillage 327

E. G. Youngs & M. J. Goss. Hydraulic conductivity profiles of two clay soils 341

G. D. Towner. The influence of sand- and silt-size particles on the cracking during drying of small clay-dominated aggregates 347

C. J. Moran, A. B. McBratney & A. J. Koppi. A micromorphometric method for estimating change in the volume of soil induced by weathering 357

K. Asumadu, R. J. Gilkes, T. M. Armitage & H. M. Churchward. The effects of chemical weathering on the morphology and strength of quartz grains—an example from S.W. Australia 375

D. W. Hopkins, R. S. Shiel & A. G. O'Donnell. The influence of sward species composition on the rate of organic matter decomposition in grassland soil 385

S. Bjarnason. Calculation of gross nitrogen immobilization and mineralization in soil 393

R. Sylvester-Bradley, D. Mosquera & J. E. Méndez. Inhibition of nitrate accumulation in tropical grassland soils: effect of nitrogen fertilization and soil disturbance 407

S. C. Hulm & K. Killham. Gaseous nitrogen losses from soil under Sitka spruce following the application of fertilizer ^{15}N urea 417

Athena Pavlatou & N. A. Polyzopoulos. The role of diffusion in the kinetics of phosphate desorption: the relevance of the Elovich equation 425

Maria de Nobili. Electrophoretic evidence of the integrity of humic substances separated by means of electrofocusing 437

B. H. Jakobsen. Accumulation of pyrite and Fe-rich carbonate and phosphate minerals in a lowland moor area 447

Carolyn G. Olson. Clay-mineral contribution to the weathering mechanisms in two contrasting watersheds 457

R. G. V. Bramley & D. L. Rimmer. Dredged materials—problems associated with their use on land 469

Number 4

A. C. B. M. Van der Kruijs, M. T. F. Wong, A. S. R. Juo & A. Wild. Recovery of ^{15}N-labelled fertilizer in crops, drainage water and soil using monolith lysimeters in south-east Nigeria 483

N. S. Bolan, J. K. Syers, R. W. Tillman & D. R. Scotter. Effect of liming and phosphate additions on sulphate leaching in soils 493

E. Tipping & M. A. Hurley. A model of solid-solution interactions in acid organic soils, based on the complexation properties of humic substances 505

M. Mench, J. L. Morel, A. Guckert & B. Guillet. Metal binding with root exudates of low molecular weight 521

P. Virakornphanich, S.-I. Wada & K. Wada. Metal-humus complexes in A horizons of Thai and Korean red and yellow soils 529

A. A. Yousif, H. H. A. Mohamed & T. Ericsson. Clay and iron minerals in soils of the clay plains of Central Sudan 539

K. Sohet, J. Herbauts & W. Gruber. Changes caused by Norway spruce in an ochreous brown earth, assessed by the isoquartz method 549

H. Ghadiri & D. Payne. The formation and characteristics of splash following raindrop impact on soil 563

A. Hadas & G. Lennard. Dependence of tensile strength of soil aggregates on soil constituents, density and load history 577

C. A. Glasbey & M. F. O'Sullivan. Analysis of cone resistance data with missing observations below stones 587

F. Bartoli, R. Phillippy & G. Burtin. Aggregation in soils with small amounts of swelling clays. I. Aggregate stability 593

F. Bartoli, E. Paterson, R. Phillippy, J. J. Demai & M. Doirisse. Aggregation in soils with small amounts of swelling clays. II. Chemistry and surface properties of Na resin stable soil aggregates 617

R. S. Shifl, M. A. Adey & J. B. Shannon. The macroporosity of artificial aggregates of varying texture 629

R. S. B. Greene, P. Rengasamy, G. W. Ford, C. J. Chartres & J. J. Millar. The effect of sodium and calcium on physical properties and microporosity of two red-brown earth soils 639
